

Smart Meters: Beyond the Greenwash

*Smart Meters are costing us money, privacy,
and our health and safety.*

Serious problems include skyrocketing utility bills, interference, burned out appliances, explosions, fires, and lack of security and privacy protection. People report head aches, ringing in the ears, heart problems, nausea, and other symptoms following installation. Smart Meters constantly transmit pulsed microwave radiation, an environmental toxin and suspected carcinogen.

PG&E NOW WANTS TO CHARGE YOU HUNDREDS of
dollars to opt-out...
