

California Public Utilities Commission
505 Van Ness Avenue
San Francisco, California 94102

President Michael Peevey and Commissioners,

This letter is to inform you that as a customer of PG&E, I oppose the installation of wireless Smart Meters and insist on an immediate moratorium for the following reasons:

- Billing inaccuracy and reports of skyrocketing utility bills
- Consumer dollars wasted – too expensive, not worth the cost
- Vulnerability to hacking and security issues
- Privacy invasion
- Interference with healthcare equipment and other electronic devices
- Incompatibility with solar installations
- Interference with GFI's and AFCI's and risk of electrical shock and fires
- Waste of existing, functional meters
- Health and environmental impacts from wireless RF microwave radiation
- I don't want any more wireless RF antennas in my neighborhood
- I am EMF sensitive (sensitive to electric and magnetic fields and RF)
- Lost jobs
- I will not opt-in to the Smart Grid Home Area Network (HAN) system by installing an interior meter, nor will I install wireless RF "smart" appliances inside my home.

Please impose an immediate moratorium on Smart Meters!
