

IS YOUR SMART METER MAKING YOU SICK?

- Have you experienced health problems since a new PG&E Smart Meter was installed in your home?
- Are you having headaches, sleep disturbance, fatigue, ear pain, high-pitched ear ringing, heart palpitations, anxiety, difficulty concentrating, or other unexplained symptoms?
- Have you experienced interference problems with other devices or appliances?
- Has your meter exploded or caught fire? Have you had a house fire?

Do you wonder if there's a connection?

So do we...PG&E has ignored calls to investigate the aggregate impact of the increase in radiation emissions from the widespread deployment of wireless Smart Meters.

PG&E is not interested in your story but we are.

As professionals and residents, we are joining together to investigate.
